EDUCATION

University of California, Berkeley | Berkeley, CA   Expected Graduation **Jan 2025**
B.S. - Electrical Engineering and Computer Science   *Cumulative GPA:* **3.79** / **4.0** *(Sp '22, Fa '23 Dean's List)*

Relevant Coursework: Data Structures, Algorithms, Machine Learning, Artificial Intelligence, Computer Security, Machine Structures, Optimization Models, Discrete Mathematics, Probability Theory, Multivariable Calculus, Linear Algebra
Organizations: Blockchain at Berkeley, Eta Kappa Nu, Chi Psi Fraternity

SKILLS & TECHNICAL TOOLS

Languages: Python, Java, Javascript, Typescript, C, Go, SQL, Solidity, HTML/CSS, Scheme
Software: Git, Github, Flask, Node.js, React, Express, PostgreSQL, MongoDB, IntelliJ, Jupyter, AWS, Heroku, Postman, GraphQL

EXPERIENCE

Incoming Software Engineer Intern | Cisco   *San Jose, CA, May 2024 - Aug 2024*
- Will be contributing to Cisco's networking and routing team as a software engineer intern over the upcoming summer.

Full Stack Software Engineering Intern | Campaign Layer *(Web3 Tech Startup)*   *Remote, Jun 2023 - Aug 2023*
- Played a pivotal role on a small engineering team crafting a cutting-edge music subscription service V1 launch product using Node.js, TypeScript, React, and MongoDB currently used by artists with millions of monthly listeners.
- Designed and integrated key features including reward redemption functionality, user authentication, engagement campaign tracks, and social media engagement monitoring contributing to a 40% surge in artist acquisition post-launch.

Academic Intern | UC Berkeley   *Berkeley, CA, Jan 2023 - May 2023*
- Educated students on low-level concepts from RISC-V to bit-level descriptors; analyzed students' CPU design optimality.

Software Engineering Intern | CodeMaya *(Web Dev Consulting)*   *Remote, May 2022 - Aug 2022*
- Developed production-grade REST APIs using a MERN stack, streamlining service delivery for 6 CodeMaya clients.
- Devised an innovative system to intake CSV files for processing and transferring large-scale data (over 100,000 records per upload) into a PostgreSQL database, increasing data accessibility by an estimated 70% – server in use on a daily basis.

PROJECTS

Gitlet | *Java*
- Implemented a version-control system for local and remote repositories that functions exactly as Git does; designed with treemap data structure and concepts of persistence, serialization, hashing, and file manipulation.

Parking Meters | *Python*
- Application leveraging real-time data from the LADOT public database and Google Maps geocoding which allows users to input an address in LA and view a map displaying all vacant parking meters within a 1km radius.

LEADERSHIP

Head of Education | *Blockchain at Berkeley*   *Dec 2023 - Present*
- Manage our educational department of over 25 active members with content reaching 200k+ students worldwide.
- Lead B@B's Fundamentals course, Developer's course, EdX course, and internal education.

Treasurer | *Chi Psi Fraternity*   *Jan 2023 - Jan 2024*
- Manage a budget of over $200,000 for our 56 members with QuickBooks and Microsoft Excel.
- Work closely with Chi Psi National and Berkeley Holdings to analyze rental contracts, tax documents, and contractor fees.
